EDUCATION

New York University

M.S. in Computer Engineering | GPA: 3.8/4.0

New York, NY

Sep 2025 - May 2027

The Chinese University of Hong Kong

B.Eng. in Computer Engineering

Hong Kong

Sep 2021 - Jun 2025

PROFESSIONAL EXPERIENCE

Yanfeng Automotive Interiors

Software Engineer Intern

Novi, MI

May 2026 - Aug 2026

- Built a multi-agent forecasting platform with **FastAPI**, **LangGraph**, and **OpenAI SDK** for **4 departments**, turning part-order data into production forecasts and reducing the planning data cycle from **2 weeks to 10 minutes**.
- Built persistent task state and memory with **Temporal**, **PostgreSQL**, and **Redis**, reducing per-run token usage by **90%** and P95 context-assembly latency from **1.2s to 430ms**.
- Built a **PostgreSQL** semantic layer and **Text-to-SQL** query agent with hybrid **BM25 / vector retrieval** and reranking, improving retrieval recall from **58% to 90%**.
- Built automated evaluation gates and regression tests with **GitHub Actions** and **Langfuse**, incorporating production failures into release checks and reducing regressions on solved tasks from **21% to 5%**.

Capgemini

Software Engineering Intern (Backend Development)

Aug 2024 - Sep 2024

- Built a **Java / Spring Boot** transaction backend with **Redis Lua** and **RocketMQ**; sustained **1,000+ QPS** at **P99 < 300ms** in load tests, with **zero** oversells across **12** fault-injection scenarios.
- Built order-inventory recovery with **MySQL**, **Redis**, and **RocketMQ**, using a transactional outbox and idempotent consumers to reduce recovery time after MySQL failure from **30 to 3 minutes** in injected failure cases.
- Built a task-orchestration engine and state-machine component in **Java / Spring Boot**, cutting aggregation latency by **50%** and enabling new business workflows with **zero** core-engine changes.
- Fixed a **Tomcat** thread-pool bottleneck and **MyBatis-Plus** concurrency bug found under load tests; added multi-tier **Redis** caching, reducing peak MySQL reads by **75%** and P99 latency by **60%**.

NIO

Machine Learning Engineer Intern

May 2024 - Jul 2024

- Post-trained a manufacturing defect-detection model with **PyTorch**, **LoRA**, **SFT**, and **DPO** on paired inspector judgments, improving accuracy from **76% to 91%**.

VisionNav Robotics

AI Algorithm Engineer Intern

Jul 2023 - Aug 2023

- Tuned point-cloud segmentation, registration, and obstacle recognition with **Open3D** for autonomous forklift perception; built datasets from **140GB+** of data and contributed to the BrightEye system.

NYU RESEARCH PROJECTS

RoboRefer | Cross-View Consistency

Sep 2025 - Apr 2026

- Supervised fine-tuned **LLaVA** on **10,000+ ScanNet++ images** with overlapping-object disambiguation, improving cross-view recognition success from **65% to 86%** in physical robot-dog tests.

Code Avatar | 3D Authentication Security

Sep 2025 - Apr 2026

- Trained **PyTorch Transformer** models across identities to identify latent-space expression transformations; generated altered facial expressions that passed liveness detection in experiments, exposing a VR/AR authentication risk.

SKILLS

Languages: Python, Java, SQL, TypeScript, JavaScript, Bash

Backend & Data: Spring Boot, FastAPI, REST APIs, PostgreSQL, MySQL, Redis, RocketMQ, Temporal, MyBatis-Plus

AI & ML: PyTorch, OpenAI SDK, LangGraph, MCP, RAG, Langfuse, LoRA / SFT / DPO, OpenCV, Open3D

Cloud & Tools: AWS (Lightsail), Azure, Alibaba Cloud, Docker, Kubernetes, Linux, Git, GitHub Actions
